

Architecture

- TRAFFIC FLOW SUMMARY**
- ① Public users → WAF/CDN (DDoS protection, TLS)
 - ② WAF routes traffic → Email/SaaS applications
 - ③ Apps authenticate via IdP/SSO with MFA

- ⑤ Remote users connect via ZTNA → Staff VLAN
- ⑥ All VLANs/Endpoints route via NGFW → Internet
- ⑦ SaaS data backed up to immutable storage

- ⑧ All layers send logs/alerts → SIEM/MDR
- ⑨ SIEM creates tickets/pages for SOC response
- 🔑 Key Vault stores all secrets, certs, and keys
